

Minimum Disclosure Document - 31 December 2024

**FUND PROFILE**

The Taquanta Equity FR Fund is actively managed and aims to exceed the returns generated by the benchmark over a 3-year rolling period where portfolio position deviation from the benchmark is minimised. The portfolio is not a tracking fund, but will closely replicate the composition of the benchmark and aims to over time generate returns in excess of the benchmark by following a portable alpha investment strategy.

**FUND OBJECTIVE**

The objective of the portfolio is to produce enhanced returns relative to the benchmark over rolling 3-year periods where portfolio position deviation from the benchmark is minimised and to overtime generate long-term capital growth.

**INVESTMENT STRATEGY**

The portfolio invests in select combinations of equities, equity securities, equity securities listed on the Johannesburg Stock Exchange or listed and unlisted financial instruments. The portfolio will not invest in international equities, equity securities, international listed and unlisted financial instruments or in Africa (outside of South Africa).

**ASSET ALLOCATION**

Equity exposure is achieved via investments in the derivative market.

**FEES**

Service Fee (excl. VAT p.a.):	0.50%
Cost Ratios (incl. VAT):	
* Total Expense Ratio (TER%) <sup>2</sup> :	0.57%
* Transactions Costs Ratio (TC%):	0.00%
* Total Investment Charges (TIC%) <sup>1</sup>	0.57%
* Performance Fee (PF) Included in TER:	0.00%

<sup>1</sup> Total Investment Charges (TIC%) = TER (%) + TC (%). <sup>2</sup> The Total Expense Ratio (TER%) of a portfolio, expressed as a percentage of the daily average value of the portfolio, is calculated over a period of usually a financial year and represents a measure of the portfolio's assets that were relinquished to meet portfolio operating costs, including charges, levies and fees. Typical expenses which are deducted from a portfolio include service charges, taxes, trustee fees and audit fees. <sup>3</sup> Unit prices are published daily on the Manager's website. Investor instructions received after 14:00pm shall be processed the following business day.

## MARKET COMMENTARY

**Lower Interest Rates:** On November 21, 2024, the South African Reserve Bank (SARB) reduced its primary interest rate by 25 basis points to 7.75%, reaching the lowest level since April 2023. This widely anticipated move aimed to balance weak economic growth with stable inflation expectations post the global monetary tightening cycle. While short-term inflation remains contained, the medium-term outlook suggests potential upward risks. The SARB revised its 2024 inflation forecast down to 4.5% (from 4.6%), maintained its 2025 projection at 4%, and raised the 2026 estimate to 4.6% (from 4.4%), driven by anticipated electricity price hikes.

In the United States, the Federal Reserve (Fed) reduced interest rates by 25 basis points in December 2024, setting the range at 4.25%-4.5%. This was the third consecutive cut, following reductions of 25 basis points in November and 50 basis points in September.

**Volatile Exchange Rate:** The South African rand came under pressure due to the Fed's hawkish tone on future rate policy. In the final week of December, the exchange rate against the US dollar fluctuated, with a low of 18.604 on December 26 and a high of 18.898 on December 31. This volatility underscores the sensitivity of emerging market currencies to external factors, such as US monetary policy shifts, which impact investor sentiment and capital flows.

**Subdued Economic Performance:** South Africa's GDP contracted by 0.3% in Q3 2024, following 0.3% growth in Q2. The contraction was driven by declines in the primary sector (mining and agriculture), while secondary and tertiary sectors experienced slower growth. Despite the quarterly setback, GDP in Q3 2024 was 0.3% higher compared to Q3 2023. For the full year, GDP growth is expected at approximately 0.8%, reflecting ongoing challenges such as electricity supply constraints, weak business confidence, and subdued private investment. Key sectors like mining and manufacturing were negatively impacted by global commodity price volatility and logistical inefficiencies, though resilience in agriculture and growth in renewable energy investments offered some support.

In South Africa, the SWIX Index delivered -0.287% m/m, while the JSAPY TR ZAR delivered 0.407% m/m for the month of December.

**Please Note:** The above commentary is based on reasonable assumptions and is not guaranteed to occur.

## GLOSSARY

**Net Asset Value (NAV):** Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.

**Annualised Return:** Is the weighted average compound growth rate over the performance period measured.

**Highest & Lowest Return:** The highest and lowest rolling twelve-month performance of the portfolio since inception.

**Total Expense Ratio (TER):** Reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

**Transaction Costs (TC):** Is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.

**Total Investment Charge(TIC):** Should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.

**Total Investment Charges (TIC%):** = TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).

**Derivative / Financial Instrument:** A contract that derives its value (positive or negative) from another asset.

**Alpha:** Denoted the outperformance of the fund over the benchmark.

## FUND RISK

**Derivative Risk:** Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.

**Volatility Risk:** Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at Risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.

**Concentration and Sector Risk:** A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.

**Equity Risk:** Applies to investment in shares or derivatives based on shares. The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares. Equity risk can either be systematic risk which is risk to the entire market based on political and economic indicators or unsystematic risk which is company specific and includes risk relating to company profits, future prospects and general consensus on the company or sector.

## MANDATORY DISCLOSURE:

Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges, minimum fees, and maximum commissions, as well as detailed description of how performance fees are calculated and applied, is available on request from FundRock Management Company (RF) (Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commissions and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published daily on the Manager's website. Additional information, including Key Investor Information Document ("KIID"), Minimum Disclosure Document ("MDD"), as well as other information relating to the basis on which the Manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority ("the Authority") under the Collective Investment Schemes Control Act No. 45 of 2002 ("CISCA"). The Manager retains full legal responsibility for the portfolio.

The Financial Services Provider ("FSP"), Taquanta Asset Managers (Pty) Ltd, FSP No. 618, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services. The annualized total return is the average return earned by an investment each year over a given time period, since the launch date of the portfolio. Actual annual figures are available from the Manager on request. The highest and lowest one (1) year returns represent the highest and lowest actual returns achieved during a 12-month rolling period year since the first launch date of the portfolio. The performance figures are the yields on a Net Asset Value ("NAV") basis. The yield figure is not a forecast. Performance is not guaranteed, and investors should not accept it as representing expected future performance. Individual investor performance may differ as a result of initial fees, time of entry/actual investment date, date of reinvestment, and dividends withholding tax. Performance is calculated for a lump sum investment on a NAV. The performance figures are reported net of fees with income reinvested. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees.
