

Nedgroup Investments Core Bond Fund

Class A

August 2020

INCOME RANGE

RISK RATING

Risk reward profile

For credit and income instruments, while unlikely, capital loss may occur due to an event like the default of an issuer. The portfolio typically displays higher volatility than a money market portfolio, but lower volatility than a general equity or balanced portfolio.

Portfolio structure

1) The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month.
Data source: © Morningstar Inc. All rights reserved.

2) Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund, relate to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impact fund returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investment costs of the Fund. Both the TER and TC of the Fund are calculated on an annualised basis, beginning 01/07/2017 and ending 30/06/2020.

PORTFOLIO ATTRIBUTES

A South African bond portfolio which aim to produce superior risk adjusted returns relative to the peers by charging lower fees and staying largely neutral on modified duration.

Key characteristics of the fund:

- Low fees and total investment charges (as per front page)
- Staying largely neutral on modified duration versus (vanilla) bond peers
- A low turnover approach

INVESTMENT MANAGEMENT

The Nedgroup Investments Core range is implemented by Taquanta Asset Managers, an independent, owner-managed firm. Taquanta has been an industry leader in delivering successful and innovative quantitative fund management since 1996. The Quants team is one of the most experienced and stable in the industry and their index tracking process has a reputation for attention to detail with cost efficiency and very low tracking error.

The current portfolio manager is Charles Alderman.

INVESTMENT PHILOSOPHY

Due to the small dispersion in performances between bond funds the Nedgroup Investments Core Bond Fund aims to produce superior risk adjusted returns by charging lower fees and staying largely neutral on modified duration relative the bond peers (excluding Multi-managers, ILB and ALBI tracker funds). The fund has exposure to credit which is selected using Taquanta's credit process.
